At the time of your home inspection, let the FEMA inspector know you have a private well and/or septic system that may have been damaged by the hurricane.

## Be Safe When Cleaning Up

Follow the direction of local authorities as you clean up. Be aware of safety concerns and separate debris for collection as instructed by local officials. Before cleaning up, make sure to document any property damage with photos and receipts. Use generators only outdoors and at least 20 feet from windows, doors, and attached garages.

Make sure to keep the generator dry and protected from rain or flooding. Residents should not try to clear landslides that are blocking roads without consulting a professional geologist or engineer.
